## Using Numbers to Subtract

Subtract to find how many are left.

This is a subtraction sentence.

$$\begin{array}{r} 5 \\ 5 \\ 5 \end{array} \begin{array}{l} \text{take away} \\ \text{minus} \\ - \end{array} \begin{array}{r} 2 \\ 2 \\ 2 \end{array} \begin{array}{l} \text{is} \\ \text{equals} \\ = \end{array} \begin{array}{r} 3 \\ 3 \\ 3 \end{array}$$

Write a subtraction sentence.

4 minus 1 equals 3.

$$\begin{array}{r} 4 \\ 4 \\ 4 \end{array} - \begin{array}{r} 1 \\ 1 \\ 1 \end{array} = \begin{array}{r} 3 \\ 3 \\ 3 \end{array}$$

5 minus 2 equals 3.

$$\begin{array}{r} 5 \\ 5 \\ 5 \end{array} - \begin{array}{r} 2 \\ 2 \\ 2 \end{array} = \begin{array}{r} 3 \\ 3 \\ 3 \end{array}$$

### Problem Solving *Writing in Math*

3. Draw a picture that shows subtraction.  
Write a subtraction sentence to go with it.

**Las respuestas pueden variar.**

\_\_\_\_\_

Cross out to subtract.  
Then complete the subtraction equation.

### Example

$3 - 1 = \boxed{2}$

$6 - 2 = \boxed{4}$

$10 - 7 = \boxed{3}$

$7 - 6 = \boxed{1}$

$9 - 5 = \boxed{4}$
